

Medication Storage Tips

- **Store medicines in a cool, dry place**
- **Avoid storing medicines in areas with high heat or moisture such as bathrooms or near kitchen appliances**
- **Always check for specific storage instructions, such as refrigeration**
- **Store all medicines in one area of the home in a secured cabinet**
- **Do NOT mix different medicines in the same container unless they are placed in a medication organizer**
- **Keep medications up and out of reach from children and pets**
- **Keep medications in childproof bottles, if able**
- **Frequently check the expiration dates of your medicines**
- **Properly dispose of expired medications**
- **Do not take any medicine that has changed color, smell, or texture**
- **For any questions about storage information for your medicines, ask your local pharmacist**
